Re: Comments on the Draft Fact Sheet for the Proposed Remedial Action
Plan (PRAP) for Sites 5 & 8 at the former Naval Construction
Battalion Center, RI

Dear Mr. Krivinskaskas:

Pursuant to # 7.6 of the NCBC Federal Facility Agreement (FFA),
please find attached the Environmental Protection Agency's (EPA)
comments on the above referenced document.

In order to speed up the review process, please fax me redlined pages
for our quick review of the wording changes. EPA expects the Navy to
provide a final PRAP for our quick review before the PRAP is issued
to the public.

If you have any questions with regard to this letter, please contact
me at (617) 573-5736.

Sincerely,

Christine A.P. Williams
Remedial Project Manager
Federal Facilities Superfund Section

EPA comments on Draft Fact Sheet for NCBC IR Program Sites 5 & 8

1. Page 1; change the tittle to "Fact Sheet on the Proposed
Plan....."

2. Page 2; a figure should be added that provides a site layout,

01019

such as Figures 2 & 3 from the other PRAP reduced to fit on one page. Add the location of such a figure to each paragraph of history.

3. Page 2; add a sentence to explain the levels of lead found, such as adding after the first sentence of the Nature of Contamination section, "Lead was detected in levels slightly above the Rhode Island lead free standard but below the federal screening level, and presented no health risks to the future industrial/commercial workers at the site." and then after the third sentence in the next section add, "...lead was detected in low levels in some..."

4. Page 3; Change "Site Investigation" to "Site Inspection", this terminology provides the opportunity to use a No Further Action Decision Document rather than a No Action Rod, if the situation warrants.

5. Add to the PA/SI description: "The PA/SI stage also included the 4 Study Area Screening Evaluations and will include the EBS Phase II Review Item Inspections."

6. Page 3; add my name, address and telephone number for additional information.
